Skills

- Python
- Version Control
- Java
- JavaScript – ReactJS/React Native/Web3.js
- Data Warehouse/Automation Testing
- AWS Services: EC2, S3, CloudFront
- SQL
- Microsoft Office

Work Experience

Real-Time Technology Solutions (RTTS)

New York, NY

Software Test Engineer

09/2022 – 11/2022

- Created manual and automated tests using Azure DevOps and Selenium with C# on Visual Studio for both web application testing and separate software applications.
- Worked on projects to build familiarity and proficiency on the process of creating, running, and completing test cases using test management software.
- Gained proficiency at Data Warehouse Testing and Service Oriented Architecture by creating automation scripts and comparing the contents to SQL queries into XML from a web service.

ViewLabs (formerly VirtualAPT)

New York, NY

Full Stack Developer Internship

09/2021 – 12/2021

- Maintained and improved multiple web applications while getting hands-on experience with AWS services such as EC2, S3, and CloudFront when building each application.
- Became familiarized with Scrum agile methodologies which includes daily stand-ups, sprints, and Trello for task management as well as hitting production on time as a team.
- Met with clients to work on building web applications from scratch for their businesses by a strict deadline for deployment.

Ideate Decide Act (IDA)

New York, NY

Software Engineer Intern

01/2021 – 05/2021

- Devised a company competitive analysis feature that provides a wide array of information about potential competitors while also becoming familiar in mobile application development using React Native.
- Tested and implemented various APIs and their endpoints by using tools such Postman and RapidAPI.
- Collaborated with a team of experienced software engineers and interns to develop and test applications.
- Participated in weekly meetings with the team to provide detailed project reports and milestone updates.

FyreSale

New York, NY

Part-time Software Developer

09/2020 – 08/2021

- Gained experience and knowledge in a professional developer team using development stack such as MongoDB, Express, React, and NodeJS (MERN Stack) to develop a functional web application
- Constantly learning more of full-stack development by incorporating frontend and backend skills to test and connect databases with an experienced team
- Introduced agile methodologies and effective practices for the team to enhance product development
- Authored code fixes and enhancements for inclusion in future code releases and patches

Education

Brooklyn College of The City University of New York

Brooklyn, NY

B.S. Computer Science

07/2022

Activities

Brooklyn College Computer Science Club

Brooklyn, NY

Member

09/2019 – Present

Northeast Hackathon

New York, NY
